What is this product?

Type

This is an investment fund established as an Irish Collective Asset-Management Vehicle (ICAV).

Objectives

Investment objective The investment objective of the Fund is to generate positive absolute risk-adjusted returns through a risk arbitrage investment strategy, which seeks to realise the price differential between the market price of securities and the anticipated value of those securities following the completion or termination of a transaction.

Investment policies To identify investment opportunities, the Investment Manager utilises a fundamental research process, which includes evaluating a transaction's likely completion, the securities' anticipated value and a transaction's expected timeframe.

There are no restrictions on the issuers, markets or sectors in which the Fund may invest; however, it focuses primarily on European developed countries and North America, with potential limited exposure to Australia, New Zealand, Hong Kong, Japan, Malaysia, Singapore, Taiwan and Thailand.

The Fund may invest in companies of all market capitalisations (including growth companies) but will generally invest in large and medium capitalisation companies.

The Fund will invest in global equities and equity-related securities including common stock and preferred stock of companies that are involved in takeovers, mergers and reorganisations and will also utilise contracts-for-difference ("CFD"), options and forwards for investment purposes or in an attempt to reduce the Fund's risk exposure to adverse fluctuations in currency exchange rates. The Fund may invest up to 15% of its net assets in fixed and/or floating corporate bonds, including convertible bonds, of any maturity, with a broad spectrum of ratings ranging from Aaa (Moody's, Fitch, S&P) through to non-rated paper.

The Fund may not invest more than 10% of its net assets in collective investment schemes.

Normally, the Fund's average leverage will be 100–200% of the Net Asset Value of the Fund, although higher levels are possible.

For full investment objectives and policy details, please refer to the section entitled "Investment Objective and Policy" in the Supplement.

Benchmark uses The Fund is actively managed without reference to a benchmark. Investments in the portfolio are not specifically selected from the constituents of a benchmark, hence the Fund's investment policy is in no way constrained.

Redemption and Dealing You may buy and sell your shares weekly, every Thursday, except for Bank Holidays in Dublin or London. Orders

to buy or sell can be made by submitting a request to the Administrator, SS&C Financial Services (Ireland) Limited, in accordance with the procedures set out in the Fund's supplement (the "Supplement"). Cleared payment for buy orders must be received by 5:00 pm (GMT) two business days in advance.

Distribution Policy The Fund does not expect to pay any dividend distributions. Instead, any income and capital gains will be re-invested in the Fund.

Launch date The Fund was launched on 27/04/2017 and the share class was launched on 29/11/2017.

Fund Currency The Fund's base currency is USD. The Fund may seek to hedge against currency fluctuations in non-USD investments.

Switching Investors have the right to switch between share classes and sub-funds of the ICAV. Please refer to the Prospectus and the Supplement for more information.

Asset Segregation The Fund is a sub-fund of the ICAV, which is an umbrella fund with segregated liability between sub-funds, established as a UCITS under the laws of Ireland. This means that the assets and liabilities of the Fund are segregated by law from the other sub-funds of the ICAV and will not be used to discharge the liabilities of such other sub-funds.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 25 November 2022 and 29 December 2023.

Moderate: this type of scenario occurred for an investment between 26 March 2018 and 26 March 2021.

Favourable: this type of scenario occurred for an investment between 28 December 2015 and 28 December 2018.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should the Fund default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 USD is invested.

Example Investment 10,000 USD	if you exit after 1 year	if you exit after 3 years (recommended holding period)
Total Costs	243 USD	880 USD
Annual cost impact*	2.4%	2.6%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.7% before costs and 5.1% after costs.
